## Geo-spatial Intelligence Training

The National Space Research & Development Agency, (NASRDA) through its Commercial and Consultancy division, is pleased to bring this specially customized Geospatial Intelligence Training/practical training course to you, as part of the Agency's mandate to promote the mass adoption and application of space technology for the security and protection of people and properties and sustainable development of the nation.

This course is the first in a series of technical training courses in Geo-spatial Data Processing, specifically designed to meet the capacity building and practical competency needs of GIS professionals, Geo-scientists/engineers, cartographers, city/urban planners etc. and those in Military, Police, Civil Defense. Through out the entire series, emphasis is placed on practical skills acquisition. Our training are conducted at various facilities across the nation and sometimes outside the country in collaboration with international partners and experts.
